ESI eMobile™

Smartphone App for the ESI eSIP Evolution Series™

GREAT for Remote Workers!

Take Your Extension Out Of The Office

Whether you're out of the office for professional or personal reasons, your business doesn't stop operating just because you're away. Take the calling features of your desk phone on the go by using the **ESI eMobile™** application for smartphones. Access voice mails, contact directories, and call recording features from wherever you may be, and always stay available to receive calls from your most valuable clients!

Key Features & Benefits:

- Call handling just like on your desktop phone: (Transfer, Mute, Hold, Record)
- View your extension's Call History
- Access corporate directories and personal contacts
- Listen to voice mails and call recordings
- Easily create conference calls directly from the app
- Enhanced encryption for secure conversations
- Set Presence Status: Available, Away, DND, Lunch Break, and Business Trip
- Supports a mobile workforce: great for remote workers, road warriors, or anyone whose job requires them to be accessible outside of the office
- Available with iOS and Android smartphones

ESI eMobile Pro™ Delivers Increased Speed, Security, & Quality

- **Remote Resilience:** Voice traffic travels through an optimized tunnel for stronger connections and clearer conversations.
- **Enhanced Resilience:** Your IT staff can freely manage the business network without the worry of inadvertently affecting the voice quality.
- **Fast Deployment:** Cloud-enabled set-up that does not require static IP addresses or port forwarding - further safeguarding security by eliminating port exposure to the Internet.

ESI eMobile™ is available for download on: Download on the App Store | ANDROID APP ON Google Play
